PREFACE

This collection of studies provides the first material needed for sight singing. It is designed to serve especially where previous sight-singing drill has not been provided for the pupils of the current fourth and succeeding school grades. It presupposes, of course, that each pupil will also have a book of songs.

The teacher should not forget that this tone and rhythm study is only one side of the work. The development which comes from the singing of songs is vitally important. Without this, the training in music is one-sided and mechanical. Only through the proper singing of suitable songs will a love and appreciation of the beautiful in music be awakened and cultivated. It is also by means of song that the rhythmic and tonal sense is quickened and developed.

It is all-important that correct habits of tone production be acquired during the first year in school, and that the head tone which is so delightful in children's singing, shall be preserved and not allowed to deteriorate. To attain this vitally important result, the teacher must maintain the same standard in all the singing. The tone quality should be just as good for the singing of the sight reading material as for the rote songs. The teacher must have the ability to discriminate between good and bad tone production, and the skill to eliminate bad tonal conditions.

All who teach singing to children should know, and never for one moment forget:

1. That before maturity, children should sing with the light, flute-like, head voice, common to all normal children.
2. That the thick, heavy, lower voice should be used sparingly or be avoided altogether.
3. That music teaching in the public schools where a harsh, strident, throaty, unmusical and unpleasant tone is tolerated, does more harm than good, and is a positive menace to the voices of children.

U. S. S.

4. That it is the duty of every teacher who attempts to teach singing to children, to prepare herself to give safe and intelligent instruction.

5. That in the matter of tone production, example is stronger than precept, and, therefore, the quality of tone used by the teacher, both in the singing class and throughout the day, is an important factor in producing good or bad results.

Supplementing the rote songs, a definite preparation for sight singing is essential. Singing of the scale and scale studies with syllable names, the ability to recognize and sing groups of scale tones from hearing, the recognition of two-part and three-part measure, and the ability to sing groups of tones from blackboard representation, are necessary in preparation for the use of the sight singing material in this book. (See Manual for Teachers, pages 3 to 13.)

The teacher should be provided with a chromatic pitch pipe and should use it to get the correct pitch for all songs and studies. The practice of songs or studies "by guess," is dangerous and results in bad tone quality and consequent injury to the singing voice.

A staff liner is also essential for the teacher's use. It saves time and adds to the efficiency of the teaching.

A SONG FOR OCTOBER

Frost-y wind makes a noise in Oc-to-ber: Chestnuts are tossed;
Sing a song of the joys in Oc-to-ber:

None should be lost! Gold-en Oc-to-ber! Sil-ver Jack Frost!

THE LOST LAMB

1. My lit - tle wool - y lamb has run a - way, just now;
2. You'd know her by her jack - et that is white, like snow;

She wandered from the pas-ture, but I don't know how.
If you should ev - er find her, won't you let me know?

The mouth, while singing, should be oval-shaped, thus , and not .
